Title Screen

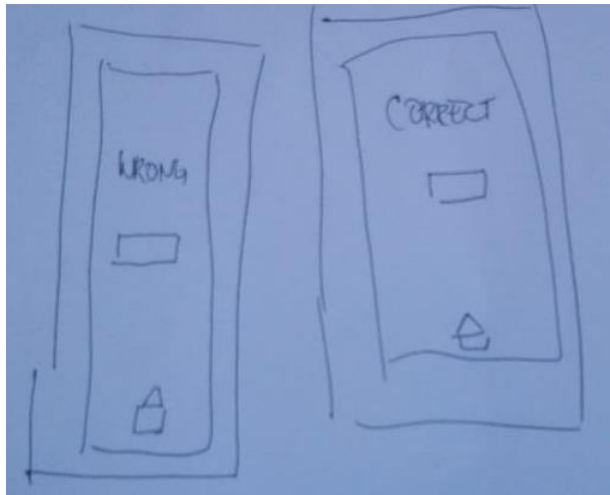

Category  
Screen

Question  
select screen

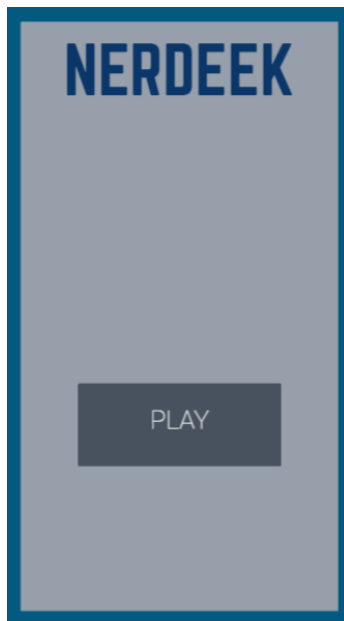

Sample question screen

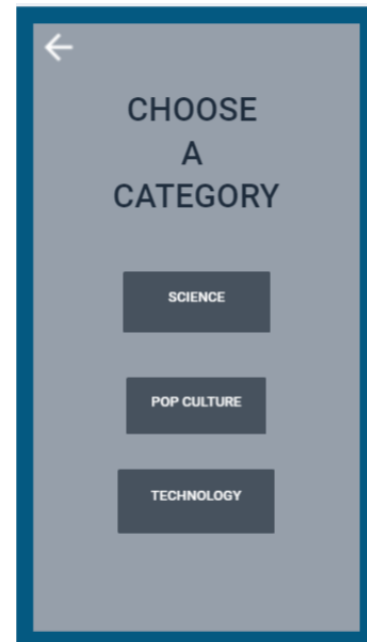

Right or wrong screen

## Mockup

This is the Title screen. The user will be directed here upon launch

This is the category screen. The user can choose the category of his/her choice. The user can also return to the title screen by selecting the back button.

Upon choosing a category, the user can choose the question to be answered. Difficulty of the question will be based on the number of stars (max 3), the more stars, the higher the difficulty.

A sample question.

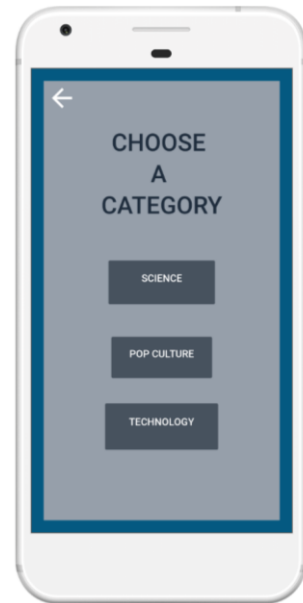

The result screens. If the user answers correctly, the correct screen will appear, if not, then the wrong screen will play out. Both screens have a 'next' button that will return to the question selection screen. Both screens also have a home button if the user wishes to return to title screen
